Digital transformation can't happen without your tech skill transformation first

The current economic climate is affecting budgets, resources, and talent, forcing technology teams across all domains to do more with less. Yet strategic initiatives remain more important than ever, with 45% of CEOs and CFOs indicating they will continue prioritizing technology investments (Gartner).

Leading technology companies must fill the gap between the future they see and the talent they have by investing in their people first.

Pluralsight Skills is the most effective path for developing tech skills, built to ensure learners deliver on outcomes faster and with better results.. With Skills, you can:

- Inventory your existing workforce to identify gaps and opportunities in tech skills
- Guide your learners' upskilling to align with your organization's top initiatives
- Ensure usage and comprehension with expert-authored, engaging content, including hands-on options
- Measure the results of your skill transformation and prove ROI

$6.5t *monetary losses from product delays, decreased customer satisfaction, and impaired competitiveness worldwide by 2025 due to skills gaps.*

—IDC
