

SKILLS STRATEGY

Fast track results by aligning learning content to business objectives

With access to thousands of Pluralsight courses, it can be difficult for learners to know where to start their reskilling journeys. Our Skills Strategy services provide guidance and recommendations for learners on their role or topics linked to your organization's most critical objectives.

With the help of our Skills Strategy team, you'll know exactly what skills your learners need and exactly what it will take to develop them.

SKILL STRATEGY AT A GLANCE:

Pluralsight content mapped to your org's biggest upskilling priorities

Implementation of learning through Pluralsight Channels

Best practices to drive ongoing improvement

HOW IT WORKS:

1. Role Selection

Working with your technology leaders and subject matter experts, we'll identify your business goals, technology roles, and tech stack to determine what roles or topics should be focused on.

2. Mapping

After reviewing your needs, we'll deliver a skills mapping that highlights learning paths, courses, and assessments aligned to your business objectives.

3. Iteration

Drawing upon the knowledge of your subject matter experts, multiple stages of iteration may be necessary to ensure only the most relevant Pluralsight content is being recommended.

4. Implementation

Your ProServ Skills Strategy is finalized in the form of a curated channel. Best practices are delivered to technology leaders and subject matter experts to empower your team to drive continuous improvement.
