# ACG Retiring Courses Crosswalk

An overview of the A Cloud Guru courses that will not be migrated and their comparable replacements on Pluralsight

As we unify the A Cloud Guru and Pluralsight course libraries, not all ACG courses will be migrated to Pluralsight. This is due to an ACG course being outdated and/or PS offers a better replacement. If you're a current ACG customer, you can continue to access the below courses until your plan is migrated.

How to use this document: Use this list to find a comparable PS course for an ACG course that is retiring, which can be bookmarked and/or added to a channel once you migrate. You can also use this list to see if a course you're currently taking is being retired. If you have additional questions, please visit our Help Center or contact your account team.
