

Customer Education Webinar: Working Smarter with Iris

Wednesday, May 20, 2026 | 11–11:45 AM ET | 4–4:45 PM GMT

Get to know Pluralsight's AI assistant

As technical roles become more complex and time becomes an increasingly precious commodity, finding answers quickly and upskilling at top speed are serious competitive advantages. In this webinar, we'll take a deep dive into the ways that Iris, Pluralsight's AI assistant, can help make your use of Pluralsight more efficient. Whether you're a learner looking for study help or a team manager aiming to curate content in seconds, this deep dive will show you how to leverage Iris to work even smarter.

In this session, we'll guide you through using Iris to:

- **Get personalized learning assistance** with real-time comprehension checks, summaries, and technical answers without leaving a course
- **Search Pluralsight's library** with increased precision, so you know which courses, modules, and clips meet your specific needs
- **Curate content in seconds**, defining an appropriate and tailored learning path for you or your team

We'll also share best practices for prompting Iris and include time for **live Q&A with product experts**.
