

Recommended browsers and operating systems for Skills

Tags: **Skills**

To use Pluralsight Skills and watch Skills videos, we recommend using the following browsers and applications. Please be sure to be on the latest version of both your operating system and your browser:

- Windows 8.1, 10, and 11; and macOS:
 - Microsoft Edge
 - Firefox
 - Chrome
 - Safari

We do not support:

- Opera
- Internet Explorer

Skills videos will work natively on Linux on a browser, since we stream videos through HTML5. Depending on your version of Linux, you might run into codec issues. The Pluralsight offline player does not work on Linux at this time.

Videos taking too long to load? See [Troubleshooting video player issues](#).

To download our mobile, desktop, and TV apps, please visit our [app downloads page \(opens in new tab\)](#). For additional help with our apps, see our [Apps and offline viewing](#) articles.

Looking for Pluralsight Flow requirements?

For recommended Flow Enterprise Server operating systems, please see the [Flow Enterprise Server article](#).

For recommended Flow cloud browsers, please see the [Flow cloud browser article](#).

If you need help, please email support@pluralsight.com for 24/7 assistance.
