Removing a payment method from your account

To remove a credit card from your account, you must have at least one credit card remaining on file. So, if you want to change the default card, add your new card first and then remove the old one. If you need help removing your card, please contact [Pluralsight Support \(opens email form\)](#) ().

Automatic updates to your payment method

Pluralsight uses a payment updater service whenever your card is reissued with an updated expiration date. This service is provided by many major credit card companies such as MasterCard, Visa, American Express, and Discover.

The purpose of this updater service is to save you time and effort. Instead of remembering to manually update your payment information with us, it is automatically updated so your card doesn't get declined and you don't lose access to Skills content.

Important: We can only update the credit card information if there was a reissue of the same card or an updated expiration date. We **cannot** and **would not** update any cards not affiliated with a card already entered in our system.

To learn more about how we handle updates to payment methods, check out section 5 of our [Terms of Use](https://www.pluralsight.com/terms#plans) (opens in new tab) (<https://www.pluralsight.com/terms#plans>).
