A. View time refers to the total amount of time you've spent watching a course, including rewatching previously viewed clips. View time does not change based on the speed that you watch a video.

B. Course progress is the sum of the duration of clips you've completed in a course. This does not necessarily represent the amount of time you've spent watching a course.

C. Duration is the total run time of the course.

D. Completion % is calculated based on **Course progress**.

Note: On a team plan, it's possible for the view time, dates, and completion history to differ slightly from what your leaders see. Please see [Course progress vs. view time](#) to learn more.

Access to your history after you leave Skills

If you leave your organization's team plan, join a different organization's team plan, or let your personal Skills subscription expire, you'll still have access to your Pluralsight account, including your history and course progress.

Without an active subscription, you will not have access to any Skills content, but your account will remain active. You can sign back up in the future to restore your access to Pluralsight's course library.

If you need help, please email support@pluralsight.com for 24/7 assistance.
