App updates

The app will automatically check for the latest version every time it is launched. If a new version is available, a dialog box will prompt you to download and install the new version.

You can also manually check for the latest version. If you're using the Windows app, click the **Help** menu, then click **Check for updates**. If you're on a macOS device, open the App Store and search for **Pluralsight**. If updates are available, there will be an **Update** button on the app page. Click it to download the latest version of the app.
