

# Using device authorization or SSO to sign in to the macOS or Windows app

Tags: Skills (<https://pluralsight.knowledgeowl.com/help/search?phrase=:Skills>)

In addition to logging in with your username or email and password, you can use device authorization to log in to the [Pluralsight desktop app](#) (). MacOS users on an SSO-enabled team plan can also use single sign-on (SSO) to log in through an SSO provider.

	Who can use this?

## Signing in using device authorization

Any active user can use device authorization to make logging in to our desktop apps easier. After you authorize a device, you'll be able to log in without entering your username and password. If you change your password, you won't need to re-authenticate your device.

**Important:** Each device should only be authorized once. If you have a device that has been authorized multiple times, remove duplicate authorizations from your [Account page \(opens in new tab\)](#) (<https://app.pluralsight.com/id/devices#>).

## Using device authorization for the macOS app

1. Open the Pluralsight macOS app.
2. Click **Sign in**.
3. Click **Use Single Sign-On (SSO)**.
4. Click **Authorize your device with a code**.
5. Take note of the 6-digit code and click the link to log in to your Pluralsight account.
6. Log in using your Pluralsight credentials.
7. On your [Account page \(opens in new tab\)](#) (<https://app.pluralsight.com/id/devices#>), enter the 6-digit code in the

**Security code** field under the **Devices** tab and click **Add device**. Each code expires after 15 minutes.

Your device has been authenticated.

## Using device authorization for the Windows app

1. Open the Pluralsight Windows app.
2. Click **Sign in using a Company, School, or Digital-Tutors account**.
3. Take note of the 6-digit code and click the link to log in to your Pluralsight account.
4. On your [Account page \(opens in new tab\) \(https://app.pluralsight.com/id/devices#\)](https://app.pluralsight.com/id/devices#), enter the 6-digit code in the **Security code** field under the **Devices** tab and click **Add device**. Each code expires after 15 minutes.

Your device has been authenticated.

## Removing authorized devices

To remove a device from your authorized devices list:

1. Log in to Pluralsight Skills from your browser (not the desktop app).
2. Click your avatar in the top right corner, then click **Account settings**.
3. Click the **Devices** tab.
4. Click **Remove** next to the device you want to remove from your authorized devices list.

## Signing in to the macOS app using single sign-on (SSO)

**Note:** SSO is only available on the macOS app.

For users on a team plan who log in to Pluralsight through an SSO provider, follow these steps:

1. Open the Pluralsight macOS app.
2. Click **Sign in**.
3. Click **Use Single Sign-On (SSO)**.
4. Enter your company URL and click **Continue**.
  - If you're not currently logged in to your SSO provider, you'll be redirected to your SSO provider and prompted to enter your credentials.
  - If your browser displays a pop-up asking your permission to open the Pluralsight app, click **Open Pluralsight**.

You're now logged in to Pluralsight Skills.
