Common questions

Where can I access my test data?

You can view your exam session details in the CyberVista portal from the dashboard, under **Exam Simulation**.

Can my plan admin or team manager see my results?

Test details are only available to learners, so test data can only be viewed and saved by learners themselves. Plan admins and team managers can't see or export their team member's data.

I used to access Transcender. Can I access that data anywhere?

Transcender users can no longer access historical data as of March 16, 2018.

If you need help, please email support@pluralsight.com for 24/7 assistance.
