<u>Admins:</u>				+	✓

+ Available as a [plan add-on](#)

Overview

Personalized skill analysis gives insight into your strengths and gaps by topic, making it easier to identify areas for skill development.

Personalized skill analysis can change based on the assessment retake results. This is key to tracking improvement.

Your personalized skill analysis is only visible to you.

Getting your personalized skill analysis

In order to populate a personalized skill analysis, complete the following:

1. Take a skill assessment.
2. Score in the 20th percentile or higher (a 101+ Skill IQ).

Once both of these steps are complete, your personalized skill analysis is ready for you. If you receive a Novice skill level, don't worry—you can retake the assessment immediately with the do-over. If you've already used it, wait 14 days and take the assessment again to see if you've improved.

Finding your personalized skill analysis

Note: Personalized skill analysis isn't available for assessments in beta or for assessments that have been retired.

To find your personalized skill analysis, visit your [profile \(opens in new tab\)](#) and go to the **Skill IQs** section. Click one of the topics that shows a skill level of Emerging or higher. This takes you to the **Skill IQ details** page, which includes your personalized skill analysis. Below the **Skill IQ proficiency** chart, see your **Personalized skill analysis** and **Quick learning** recommendations based on your skill gaps.

Next, we recommend:

Quick learning: focus on your gaps

Gap: Produce non-text content that is accessible to all

- ▶ Working with Complex Images and Scenarios

Personalized skill analysis
Based on your Skill IQ

Your strengths

- Design a content structure that is consistent and clear
- Assess whether a website meets accessibility guidelines
- Test websites with consideration of how disabilities affect usage

Your gaps

- Produce non-text content that is accessible to all
- Develop custom components that are accessible to all

Explore the **Quick learning** recommendations to find the learning content needed to close your skill gaps. Once you've studied the recommended content, you can retake an assessment to see if you've improved.
