### Leader releases

#### General

Enterprise plan admins can now use auto-SSO to automatically assign learners to channels.

#### Channels

Did you create a channel for a specific business purpose, like onboarding or skilling up? Now you can set **objectives** for channels to help you identify the purpose of each channel. We've included three default objectives for you: Onboarding, Switching technology, and Skilling up. You can also create your own objectives to use across your company. You'll see these objectives in a new column in [Channels analytics](#).

---

### Mobile and offline apps

#### iOS

- Downloads now have their own dedicated tab.
  - Tap the ... **options menu** on course listings to quickly bookmark, add to channel, or download courses.
-
