Learner releases

Profile

You'll notice visual improvements to your **learning streaks** found on your [Profile](https://app.pluralsight.com/profile) (<https://app.pluralsight.com/profile>). Now you'll gain more visibility into your current and monthly learning streaks.

Role IQ

Now you can take **skill assessment retakes** from within [Role IQ](https://app.pluralsight.com/roleiq/) (<https://app.pluralsight.com/roleiq/>). You can view your retakes on your role detail page. [Click here](https://help.pluralsight.com/help/role-iq-for-learners) (<https://help.pluralsight.com/help/role-iq-for-learners>) for more information.

Conference keynotes and panels

Paid Skills subscribers now have access to select industry conferences through the [Conferences tab on the Paths page](https://app.pluralsight.com/paths?tab=conference) (<https://app.pluralsight.com/paths?tab=conference>). You can explore emerging trends and stay in-the-know on what's new in software development, data, security, IT Ops, and more with access to today's most in-demand tech conferences.

Securing your account

Add more security to your account by enabling multi-factor authentication—[here's how](https://help.pluralsight.com/help/multifactor-authentication) (<https://help.pluralsight.com/help/multifactor-authentication>). This allows you to use a third-party app to verify your identity when logging in to Skills.

Streaming video courses just got better:

For all video courses, clips now autoplay by default if your browser allows, and there's less clutter on the video course page. Plus, you'll experience less buffering because the video player now automatically detects and adjusts to your available bandwidth. You can still manually set the video quality to your choosing.

Plan admin and team manager releases

Managing your plan

If a user had a Pluralsight Skills account before joining a group plan, it wasn't straightforward what steps they should take. Now, when you invite your users that previously had subscriptions to your business plan, these users will receive guidance and troubleshooting steps specific to their needs. This allows users to join your plan and get started with Skills even faster.

Mobile and offline apps

iOS

Are you using your mobile device on your organization's Skills plan? Now in Channels, you can find all your organization's Company channels, and join, share, or leave them.
