

Managing pull request projects

Tags: **Flow**

After importing your repos, you will be able to view your pull requests in your pull request reports and manage your PR projects on the page.

Who can use this?

<u>Core</u>	<u>Plus</u>
✓	✓

Managing PR projects

To manage your PR projects:

1. Click **Settings** in Flow's top navigation bar.
2. In the left navigation under **Integrations**, click **PR projects**.

You are on the Pull request projects page. Here, you can:

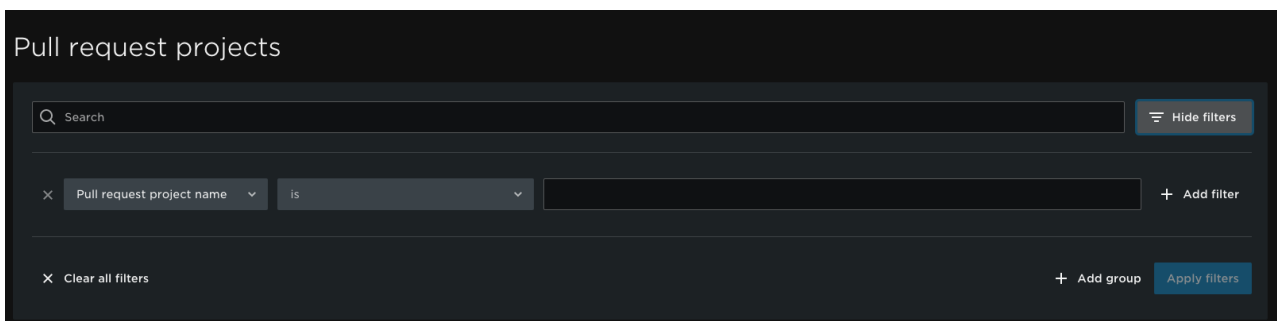

- Use advanced filtering to narrow down your project list.
- Delete projects.

Using the advanced filters

Use the advanced filters to find a select few projects you need.

To use the advanced filters:

1. Click **Show filters** next to the search box.
2. In the filters that appear, select your filtering criteria. Add filters and additional filter groups as needed.

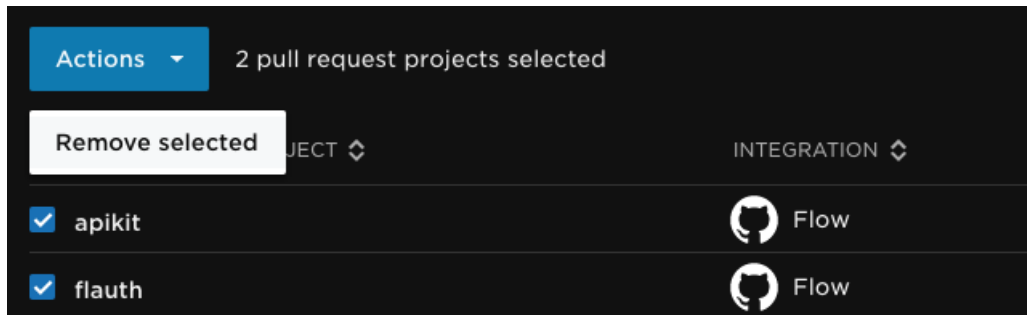

Remove (delete) projects

To delete pull request projects:

1. Select the projects you want to delete from your account using the checkboxes on the left.

2. From the **Actions** dropdown menu, click **Remove selected**.

A message appears confirming your selection. Click **Yes, remove pull request data**.

Delete all pull request data?

All pull request data for selected projects will be deleted.
Are you sure you want to continue?

Cancel

Yes, remove pull request data

You successfully deleted your project.
