An Event represents a labeled date of note that is defined by a user and appears in various reports to offer context. Events can be given tags, which allow them to be organized into logical groups.

**Who can use this?**

<table>
<thead>
<tr>
<th></th>
<th>Core</th>
<th>Plus</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

**Supported request**

Get a list of events:

https://flow.pluralsight.com/v3/customer/core/events/
