

Pull request comments API

Who can use this?

Core Plus

A pull request comment is a comment made by a user related to a specific pull request.

Supported requests

Get a list of pull request comments:

```
https://flow.pluralsight.com/v3/customer/core/pull_request_comments/
```

Fields

Name	Type	Description
id	double	Unique identifier for a pull request comment.
user_alias_id	double	Unique identifier assigned to an user alias.
user_alias_id__in	double	Multiple user_alias_ids in comma separated list.
apex_user_id	double	Unique identifier for the main user record for multiple user aliases that is associated with a PR comment.
apex_user_id__in	double	Multiple user_alias_ids in comma separated list.
pull_request_id	double	Unique identifier for the pull request.
body	string	Pull request comment body.
word_count	string	Total number of words in comment.
comment_robustness	string	How robust the comment is, indicated by robuts, regular, trivial.
is_extension_comment	boolean	Returns true if the comment is a follow-on comment (a second consecutive comment made by the same author).
parent_id	double	Unique identifier of parent pull request comment.
reaction_time	double	In seconds, the time it takes to respond to the comment.
created_at	double	Date and time comment was created.
updated_at	double	Date and time comment was updated.
is_reply	boolean	Returns true if the comment was made in reply to another comment.
was_influential	boolean	Returns true if the comment resulted in the submitter adding a follow_on_commit.
comment_type	string	Type of comment.
