

# Pull request events API

Who can use this?

Core Plus

A pull request event is an event about a pull request such as a comment or an approval. It is supplied to Flow by the vendor.

## Supported request

Get a list of pull request events:

```
https://flow.pluralsight.com/v3/customer/core/pull_request_events/
```

## Fields

Name	Type	Description
id	double	Unique identifier for an event.
user_alias_id	double	Unique identifier assigned to an user alias.
user_alias_id__in	double	Multiple user_alias_ids in comma separated list.
apex_user_id	double	Unique identifier for the main user record for multiple user aliases that is associated with a PR event.
apex_user_id__in	double	Multiple user_alias_ids in comma separated list.
pull_request_id	double	Unique identifier of Pull Request.
to_state	string	The event type.
created_at	string	Date and time when the event was created.

## Example response

```
