

Ticket projects API

Who can use this?

Core Plus

A ticket project represents a project within an issue-tracking software that contains tickets. All tickets are tied to a ticket project, which is discovered using a set of credentials.

Supported request

Get a list of ticket projects:

```
https://flow.pluralsight.com/v3/customer/core/ticket_projects/
```

Fields

Name	Type	Description
id	double	Unique identifier for the ticket project.
name	string	Name of the ticket project.
url	string	URL for a ticket project.
vendor_type	string	Vendor type.
repo_id	double	Unique identifier for a repository.
added_by	string	Unique identifier for a user that added the ticket project.
created_at	string	Date and time ticket project was created.
updated_at	string	Date and time ticket project was updated.
integration	string	Unique identifier for the integration.
last_processing_success_at	string	Date and time project was last successfully updated.
processing_status	string	Status of project.
