

Flow release: December 18, 2019

Tags: **Flow**

Features/major changes

- **Slack integration**

Schedule and create messages containing GitPrime metrics to post directly to your Slack channels.

- **Deprecating reports**

We have added report deprecating notices on the PR Details, Open PR and Leaderboard reports. These reports will no longer be supported.

- **Pair programming**

We have added the ability to share credit amongst pair/group members and manually update the contributors on a specific commit.

Resolved issues

- Fixed Player Card error when selecting a repo.
- Azure/TFS connection issue
- Deleted commits appearing in the API
- Ability to set view rights to "inherit" in a bulk import team csv.

Miscellaneous updates and fixes

- Minor bug fixes

If you need help, please email support@pluralsight.com for 24/7 assistance.
