### Addition to the Pluralsight product line

Pluralsight is excited to introduce a new offering to our product line: **Pluralsight Flow** (formerly GitPrime). [Flow](#) offers unparalleled insights into the productivity and efficiency of your dev team. Flow bridges the communication gap between engineering and stakeholders with concrete data.

With this addition, the Pluralsight platform is now **Pluralsight Skills**. Skills allows you to measure and evolve the skills you need now. You'll discover which skills you need to succeed, where skill gaps exist, and what you need to work on to reach role mastery.

### Learner releases

#### New onboarding guide

New learners can now kickstart their Pluralsight Skills experience with the **Getting started: Skills learner** guide.

This [onboarding guide](#) introduces you to Skills and gives you the tools you need to get up and running. It's packed with links to maximize your experience, including taking the platform mobile, getting help, and exploring the newest content.

#### Keeping your channel organized

You can now add **sections** to your channel for more custom organization of your channel content. Sections can be collapsed or expanded to help the members of your channel focus on the content that's relevant to them. Learn more at [Editing channels](#).
