

Getting started with Flow

Chapter 4—Understand and reports

Flow

Understanding Flow's is critical to understanding what to do with the data you get from reports. When you understand , you better understand how your team is working to identify and focus on the work that matters the most.

Use our [Flow overview](#) to understand:

- What our are
- How they're calculated
- Why you should use them
- How to know what is normal for the industry.

Good in Flow give you a good way to show how your teams are delivering meaningful solutions efficiently. Learn more about what [gaming the](#) looks like for Flow and why it can be a good idea.

Flow reports

Once you understand how Flow work, it's time to start taking a look at Flow reports. Check out our [guide on Flow reports](#) to see all the reports that Flow offers. You can also see who can benefit from those reports and how to configure your reports so you see the data you want.

What's next?

Looking for more ways to customize your Flow experience? Let's set up some additional configurations.
