

Flow release: June 25, 2020

Tags: Flow

Features and major changes

- Now [pair programming](#) allows you to allocate credit for group work. You can choose to split the work between/among the contributors or give each contributor full credit.

Resolved issues

- Fixed an issue with user unmerging and errors while trying to merge users.
- Regular expression tester with PRs to exclude not displaying PRs.
- Calendar date picker showing **Last year** by default.
- Repository picker not showing when a tag is selected.

Miscellaneous updates and fixes

- Improved experiences for error pages.
- Emails from Flow come from an updated Pluralsight email address.

If you need help, please email support@pluralsight.com for 24/7 assistance.
