

About Replicated

Flow uses [Replicated](https://www.replicated.com/) to deliver their SaaS service to you as an on-premises product. This partnership allows us to give you the analysis and insight that your rely on Flow to provide inside your information technology department's chosen hosting and security solutions.

Replicated provides a large number of features to help us reach this goal:

- One-line Installation: Customers can install Flow Enterprise with a one-line shell command.
- One-click Updates: Customers can check for updates, read release notes and apply reliable updates in seconds.
- Audit Logging: Customers are provided an audit log of the important events in the application.
- Airgapped Installations: Flow Enterprise customers can install and manage the application in an environment that has no internet access.

Replicated offers many other features, and you should [visit their website](https://www.replicated.com/) for more information.
