Features and major changes

- The Retrospective report will soon be renamed to Trends. The report itself will not change.
- Now you have the option to toggle off industry benchmarks for all reports in the org.
- Now only three years of repository data will be available for reporting to support better performance. Additionally, we've made an update to the data flow to pre-process your repository data to get it ready for reports.
- We added a My users filter to the Users page so you can sort only by users on your teams.

Resolved issues

- Unable to delete team from user from the user details page.
- Unable to add user to or delete user from an imported GitHub team from the user details page.

Miscellaneous bug fixes

- Minor bug fixes.
