

Flow release: November 20, 2020

Tags: [Flow](#)

Resolved issues

- PRs appearing as excluded via regex when no regex has been created.
- Team and user view rights columns still visible when **Enable advanced view rights** is disabled.
- **Visit URL** link for self-hosted Git servers not linking to the correct place.

Miscellaneous updates

- Various email reporting improvements.
- Added more filter and search options to integrations details pages to help locate ticket projects.

If you need help, please email support@pluralsight.com for 24/7 assistance.
