Submitter fundamentals shows team leads and managers how engineers and teams behave when they submit code for review. Submitter fundamentals provides the ability to see longer-term trends on key metrics at the organization and team levels.

Define targets at the organization, team, and individual levels and compare metrics against configurable targets.

Note: Submitter fundamentals only shows data based on merged PRs.

Metrics Include:

- Time to merge
- Responsiveness
- Comments addressed %
- Receptiveness %
- Unreviewed PRs %

Using Submitter fundamentals

Team leads, managers, and executives use Submitter fundamentals to view code submission trends over time.

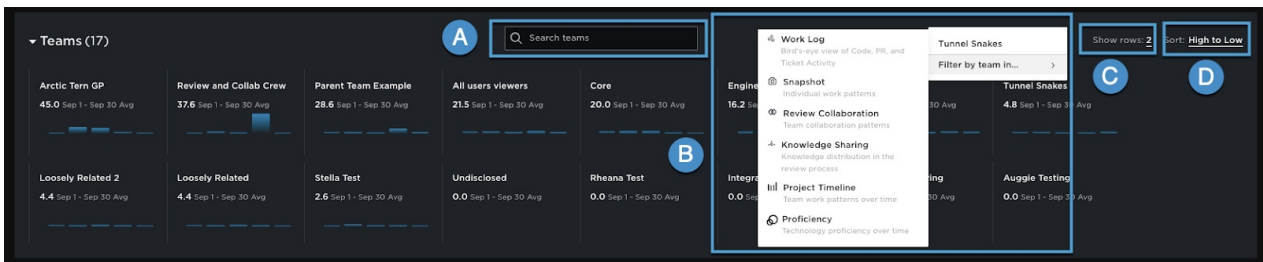

- A. Use the filters to select the repo, team, items, and date range you want to view. The filter defaults to all users.
- B. Use the tiles to view Time to merge, Responsiveness, Comments addressed, Receptiveness, and Unreviewed PRs metrics. Click on a tile to view more details on a bar chart.
- C. Use the bar chart to see the average for each metric over the selected period. If there's more than four complete Monday—Sunday weeks selected, Flow displays a trend.

Viewing a team's Submitter fundamentals

The section below the Submitter fundamentals graph shows the average for each metric across teams. Click into a team to view its Submitter fundamental metrics, nested teams, or individual contributors on that team.

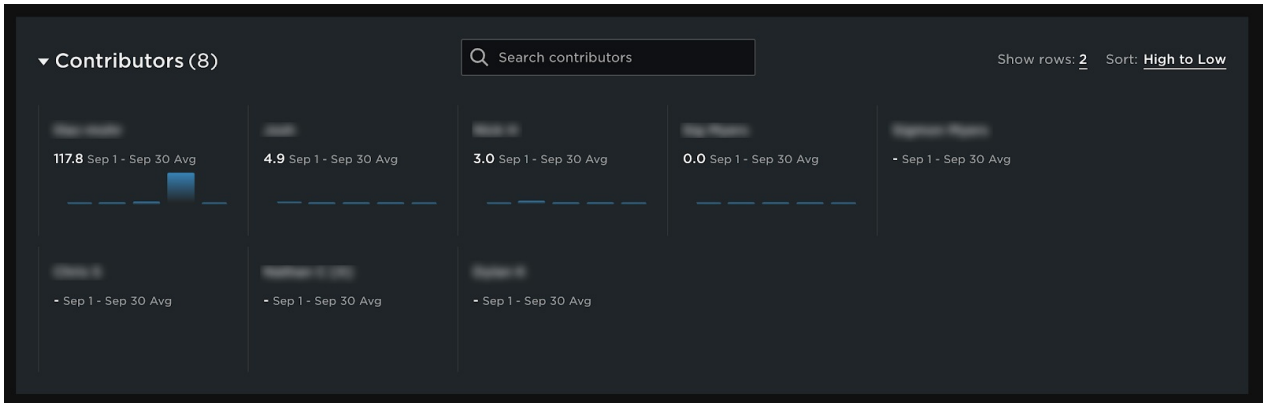

- A. Use the search bar to find a particular team.
- B. Click a team, then click **Filter by team in...** to select a different Flow report to view that team's metrics in.

- C. Use the Show rows filter to select the number of rows you want to view.
- D. Filter teams by metrics and team name. You can filter metrics from high to low or low to high. Filter teams alphabetically or reverse alphabetically.
