

## Daily update

Tags: [Flow](#)

Daily update shows your team's impact over time and an overview of their commit activity from the prior work day.

Use this data in your team's workflows and daily standups. Review the prior day's commit activity and status on workflows to view a full picture of your team's activity. Learn more about [Impact](#).

Who can use this?

Core

Plus

**Note:** This report is only available for current Flow Plus plans and Flow Enterprise Server. It is not available for new customers.

## Daily update overview

If you're a team lead, manager, or scrum master, use Daily update to:

- View a team's weekly impact
- View a team's commit activity on the previous day
- Inform your team during daily standups

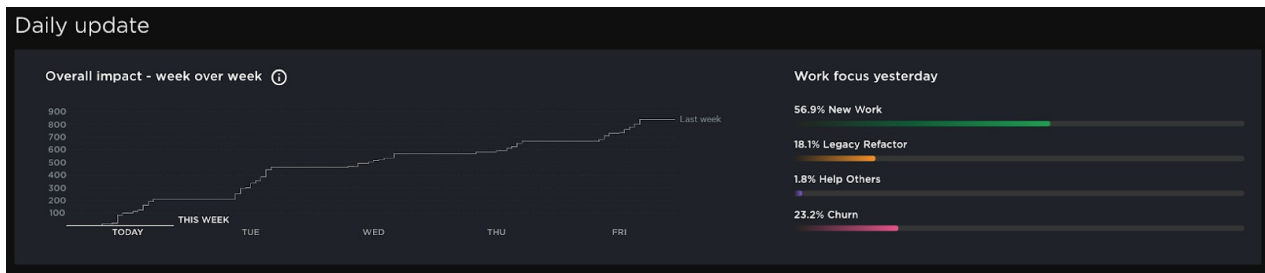

To view your Daily update report:

1. Click **Reports** in Flow's top navigation.
2. In the left navigation under Daily check, click **Daily update**.

[back to top](#)

# How do I view Impact?

**Overall impact - week over week** shows how many lines of code your team contributed to each day of the work week. **Work focus yesterday** shows the percentages of each work type contributed the previous day.

[back to top](#)

# Who didn't check in code yesterday?

**Users didn't check in code yesterday** shows you the users who didn't check in code yesterday.

[back to top](#)

# Who contributed the most yesterday?

**Top contributor** shows the user who contributed the most code the previous day. **Top gainer** shows the user who had the most impact over the last 30 days. **Tech debt cleanup** shows the user who addressed the most technical debt.

[back to top](#)

# How do I view commit activity?

**Commits with the biggest impact** shows the previous day's commits with the largest impact. **Commits from yesterday** shows the user, commits, lines, focus, and Impact level of each commit from the previous day.

### Commits with the Biggest Impact

These 3 commits from yesterday impacted the codebase the hardest:

```
feat(api): skip wrong orgs on the useraliaslinkconverter
S2-583: added vault support for both src and dst db
refactor(GroupCommitEditDialog): cleanup
```

### Commits from yesterday

USER	COMMITTS	LINES	FOCUS	IMPACT LEVEL
▼ [redacted]	2	2	0% 0% 0% 100%
