

Flow release: February 11, 2021

Tags: [Flow](#)

Features and major changes

- Now you have access to [text-based email reports](#) to increase stability and performance. They have the same information as our current email reports, but with an updated design.

Resolved issues

- Default roles and permissions not being assigned correctly
- Issue integrating with Jira
- Repos not being filtered by tags
- Unable to move ticket statuses to empty columns
- Unable to select delivery time or frequency of email reports

Miscellaneous updates and changes

- Updated Pluralsight branding on the **Paths to Ignore** modal

If you need help, please email support@pluralsight.com for 24/7 assistance.
