

Flow release: April 8, 2021

Tags: [Flow](#)

Resolved issues

- Unable to sort available repos by the last modified date
- Broken link to [Impact Help Center article](#) in Digest emails
- Repos from a group are auto-importing even when auto-import is turned off
- Team filter selections don't persist when switching between reports
- Formatting issues when configuring a project from a template in the Delivery Module
- Repo picker filter not showing groups
- Unable to import teams from Azure
- **Manage Delivery Configuration** permission doesn't grant access to the **Ticket Projects** settings page
- Unable to select a group calendar when choosing which events to show on reports
- Team managers unable to filter by nested teams
- Unable to get to the merge suggestions page from an individual user's alias page
- Unable to scroll to the bottom of the Calendars page
- Configured sprints not available to select when choosing dates in Code Fundamentals
- Merge suggestions showing users that don't match the target user

Miscellaneous updates and fixes

- Updated formatting for icons in the header
- Added a confirmation modal and success banner when removing an alias from the User Details page
