

Release notes May 2021

Explore all the recent updates to the Pluralsight Skills platform.

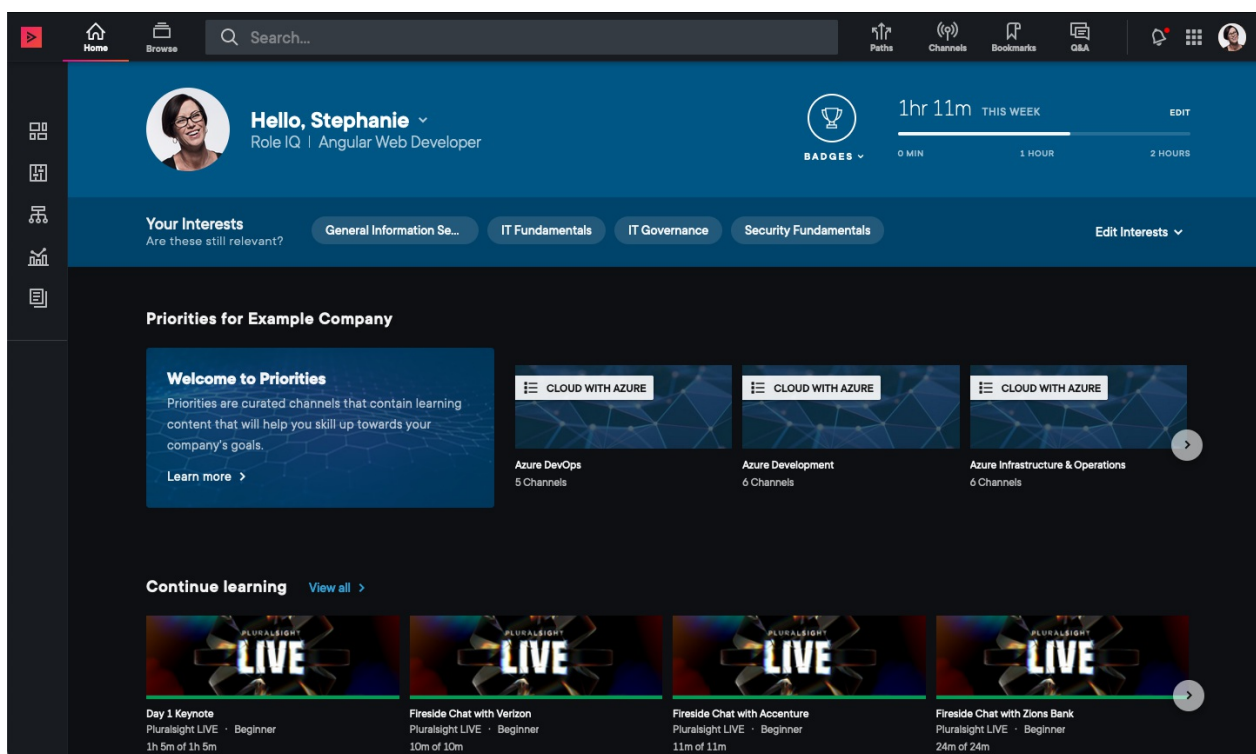

In this article

Learner releases

Learner releases

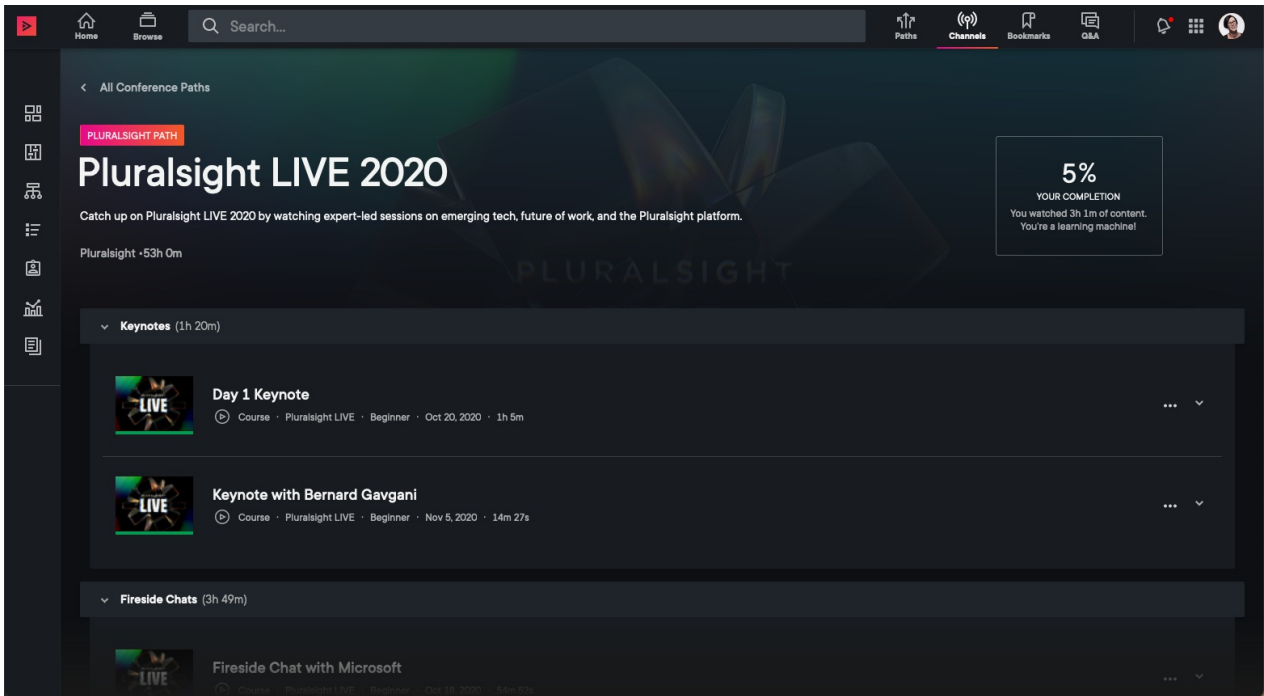

Priorities

If you're on a team plan using priorities, you can now see them on your [home page](https://app.pluralsight.com/library/) (<https://app.pluralsight.com/library/>). This makes it easier to find and engage with the content that supports your organization's strategic goals.

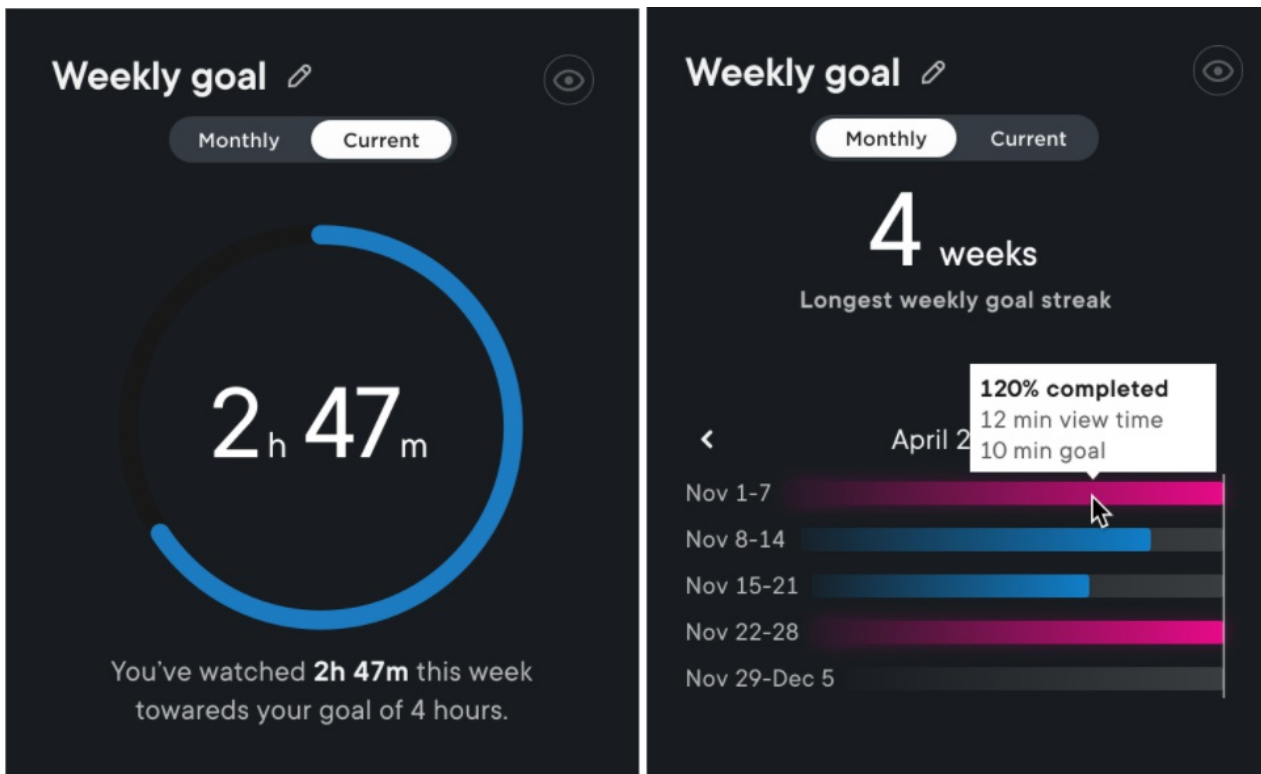

Conferences

It's now even easier to find the latest tech conferences and add them to your channels. From the [Paths page](https://app.pluralsight.com/paths?tab=conference&nav=topics) (<https://app.pluralsight.com/paths?tab=conference&nav=topics>), click the Conference you would like to watch and you'll be automatically redirected to the [Channels page](https://app.pluralsight.com/channels) (<https://app.pluralsight.com/channels>).

Goal setting

In addition to setting and viewing your weekly learning goals from your [home page](https://app.pluralsight.com/library/), you can now set and adjust these goals from your [profile page](https://app.pluralsight.com/profile/), which includes monthly historical insights and expanded details on hover-over.

Plan-based recommendations

If you're on a team plan, you can now see team- or plan-based recommendations on your [home page](https://app.pluralsight.com/library/). These recommendations will be based on trends in your team or organization, helping you skill up in the technologies most relevant to your role.
