## Learner releases

## Certifications

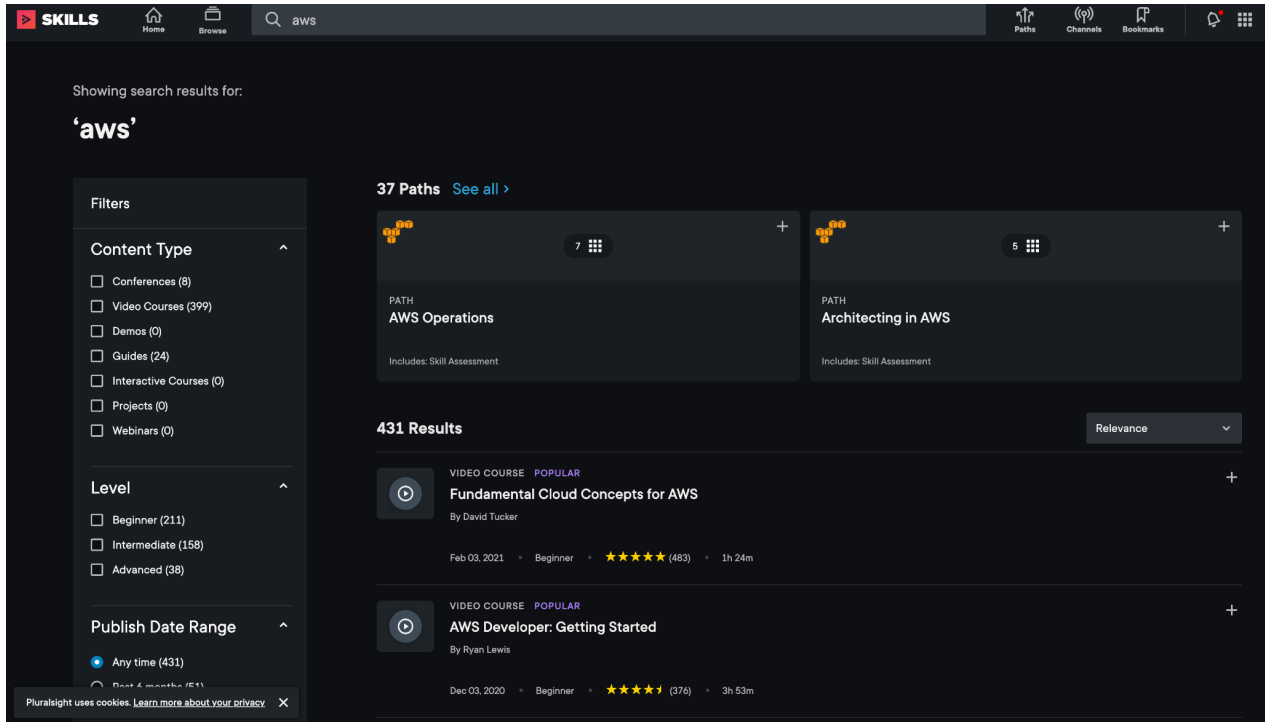

You can now find security certifications faster. In the **Browse** menu under the **Spotlight** section, you can find a list of security vendor pages. The pages will display a list of certifications and exam prep courses.

## Search

Search has a new look. The new look includes a left hand navigation that filters by content type, skill level, and

publication date. You can even find related topics from your search queries at the bottom of the navigation.

## Leader releases

### Bulk adding teams to channel groups

Within the priorities experience, plan admins can now bulk add individuals or teams to multiple channels and channel groups. See [Using priorities](#) for details.

[back to top](#)

## Mobile and offline apps

### Stack up

Learners on both Android and iOS mobile devices can now put their skills to the test and compete with other technologists for a coveted spot on our leaderboard. Stack up makes learning and practicing new skills more fun by testing users' knowledge on some of the most popular technologies, languages, and frameworks.

Share this link to the [downloads page \(opens in new tab\)](#) with your team so they can see how they stack up.

# Stack up

Test your tech skills against fellow Pluralsight users to see where you stack up on the leaderboard of greatness

## Choose your destiny

Pick a topic and answer as many questions correctly in a row.

## The competition begins

Once you miss a question, today's round is finished. No mulligans.

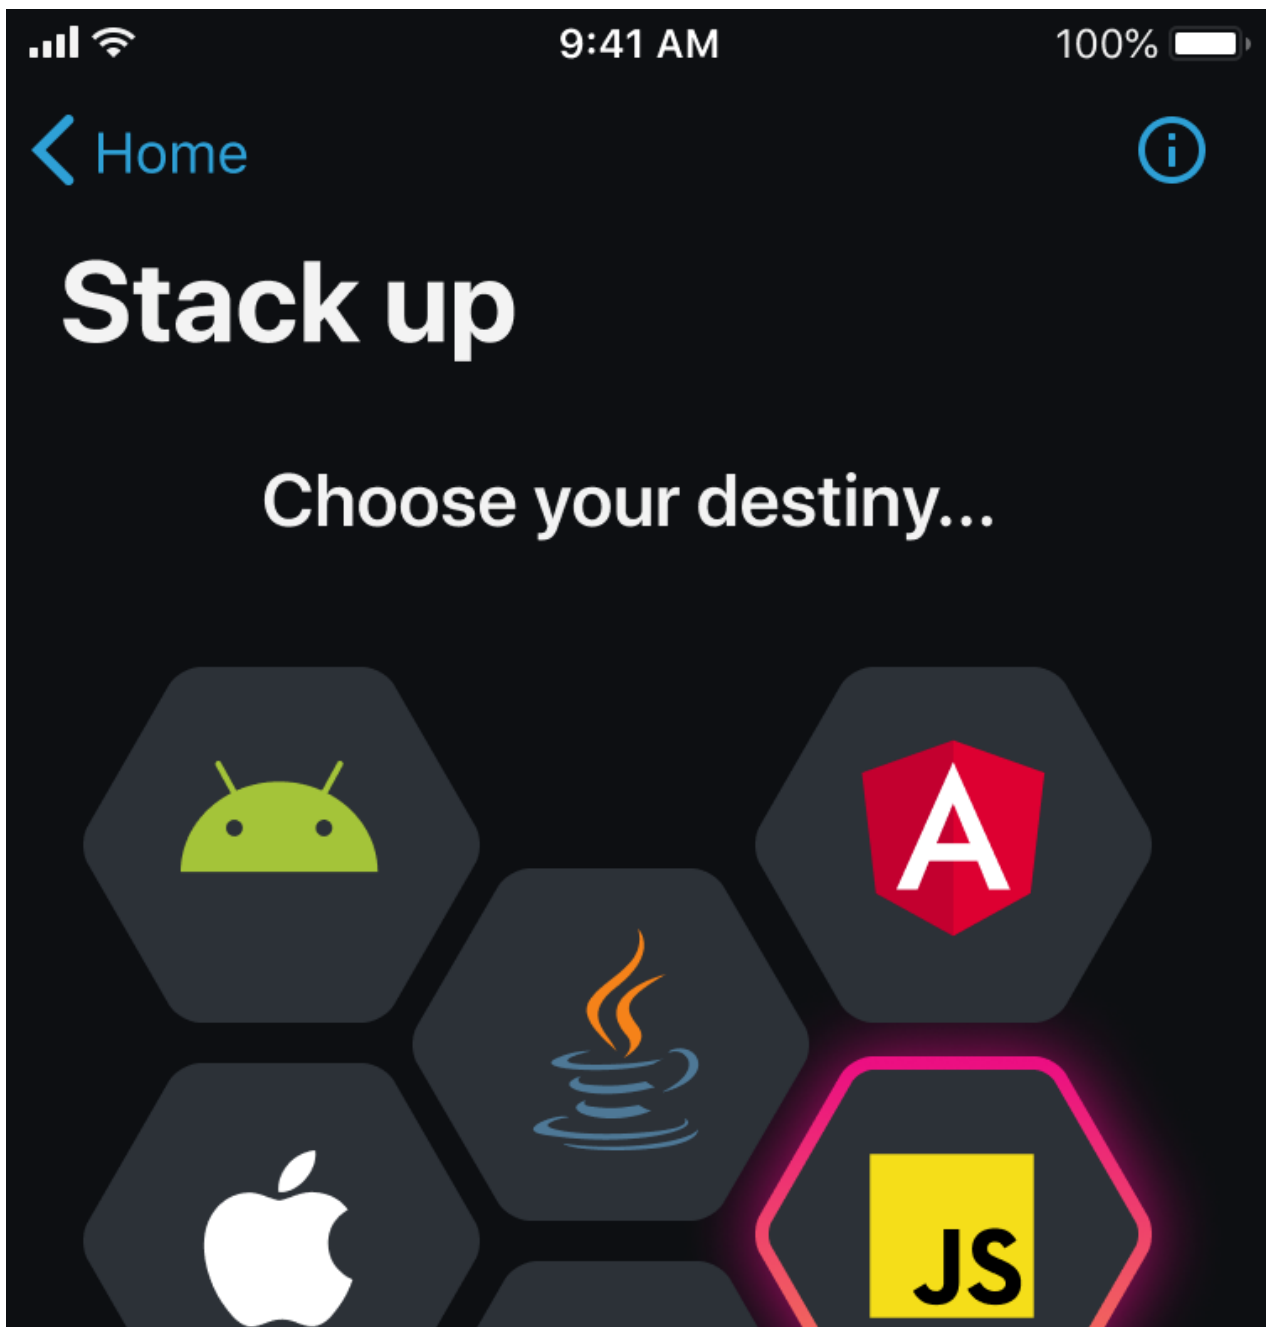

## Stack up time

Claim your spot on the leaderboard and come back tomorrow and try again!

0 Stack up | Javascript

What does the generic parameter in this code do?

```
this._http.get<IProduct[]>(this._  
productUrl)
```

- Defines a map object with key and value pairs containing the HTTP response
- Transforms a raw HTTP response to an array of products
- Passes additional data to the server with the http request

Are you sure?
