Learner releases

Certifications

The new [Certification Prep Center](#) is a starting point for your certifications journey. Now you can find popular certifications, see the top five certifications among your peers, and track your progress alongside other Pluralsight learners with the peer tracker.

Labs

Now you can take IT Ops and Security [labs](#) on the Skills platform, allowing you to test your skills in a secure, provisioned environment. This means you now have access to labs in the following domains: Cloud, Software Development, Data, IT Ops, and Security.

Live classes

Now you can enhance your learning journey with instructor-led training. These virtual, live classes offer hands-on experiences with an experienced instructor with real-world scenarios to help you learn faster.

NEW Live Classes

Enhance your learning journey with instructor-led training. Our virtual courses will accelerate your mastery by pairing hands-on learning with real-world scenarios taught by industry experts, empowering you to apply what you've learned as soon as you return to your day to day work. Register today using your plan's class credits. [Learn more](#)

Skill Assessments

Scheduling

Don't have the time to take a skill assessment? Now you can remind yourself to schedule a Skill IQ assessment for later. Click the **Remind me later** button to schedule a skill assessment.

Building Web Applications With React skill assessment

Are you a novice or expert? Find out in about 20 questions.

Each question is timed

The harder the question, the more time you're given.

You get two chances

Not happy with how you did? Try again at the end.

Got it. Start the assessment!

Remind me later

Based on your account type, your Plan Administrator(s) and your Team Manager(s) will be able to see a summary of your skills. Please contact them for details.

The assessment may cover:

- Access the DOM
- Create a basic component
- Create event handlers
- Demonstrate how to increase app performance
- Demonstrate how to style a component
- Develop and server-render a React app
- Enable UI testing
- Explain the component lifecycle
- Implement JSX features
- Manage state

Retakes

Now you don't have to wait 30 days to [retake an assessment](#). Retakes now unlock after 21 days, helping you skill up and measure your progress even faster.

Introduction to Professional Scrum

Add to channel Give Feedback

This skill path is based on the Professional Scrum Foundations Training learning objectives that were created and published by Scrum.org, and this skill provides the foundational knowledge needed to work with Scrum in a highly practical way.

This skill introduces the following topics within Scrum: Agility, Scrum, Empiricism, Scrum Values, Roles, Self-Organizing Teams, Events, Artifacts, Definition of "Done", Product Backlog Management, Release Management and Practices, Scrum Anti-Patterns, Introduction to Scaling.

The content of this course will also help you prepare for the Professional Scrum Master level I assessment. Upon successfully completing this path, participants are encouraged to visit Scrum.org resource page by following this [link](#).*

*By following this link you are leaving Pluralsight.
