

Flow release: November 19, 2021

Tags: [Flow](#)

Features and major changes

- Now both the Ticket Log and Retrospective reports have a timestamp in the upper right corner to let you know the last time ticket projects were reprocessed. If you make changes to your ticket configurations after the last time ticket projects were reprocessed, those changes will not take effect until the next reprocessing is completed.

Miscellaneous updates

- General accessibility improvements to Code fundamentals.

If you need help, please email support@pluralsight.com for 24/7 assistance.
