

Flow release: February 11, 2022

Tags: [Flow](#)

Features and major changes

- Now, if you try to delete an integration, you will be prompted with additional context about what happens when you delete an integration. Deleting integrations has data implications and should only be done on rare occasions. Learn more about [managing integrations in Flow](#).

Resolved issues

- Unable to use repo tags
- Unable to click dropdowns on the Trends report
- Unable to search for team names for users with the **View own teams** permission
- Unable to toggle on and off benchmarks on reports
- Unable to see full email address when inviting users
- Removed unused system teams from the Fundamentals reports

If you need help, please email support@pluralsight.com for 24/7 assistance.
