## Learner releases

## Search

Now you have a search option that allows you to filter search results using the new market taxonomy tags. The most common tags from the list of results are displayed in the **Topic** facet.

The screenshot shows the Pluralsight search interface for the query 'javascript'. The search results are displayed on a dark background. At the top, there is a navigation bar with icons for Home, Browse, Certifications, Paths, Channels, Bookmarks, Q&A, and a notification bell. The search bar contains the text 'javascript'. Below the search bar, it says 'Showing search results for: javascript'. The main content area is divided into two columns. The left column is a 'Filters' sidebar, and the right column shows the search results. The 'Filters' sidebar has a 'Topic' section highlighted with a pink box, containing a list of topics with checkboxes and counts: JavaScript (293), React (219), Node.js (54), Angular (web framework) (42), AngularJS (30), HTML (25), Frontend web development (23), CSS (23), TypeScript (23), and Bootstrap (21). Below the 'Topic' section is a 'Content Type' section with checkboxes and counts: Conferences (12), Video Courses (363), and Guides (275). The search results section shows '23 Paths' and '726 Results'. Two paths are visible: 'JavaScript Core Language' and 'Building Websites with HTML, CSS and JavaScript'. Below the paths, two video courses are listed: 'JavaScript Fundamentals' and 'JavaScript: Getting Started', both by Mark Zamoyta. The 'JavaScript Fundamentals' course is marked as 'POPULAR' and has a rating of 4.5 stars (450 reviews) and a duration of 3h. The 'JavaScript: Getting Started' course is also marked as 'POPULAR' and has a 1% progress indicator.

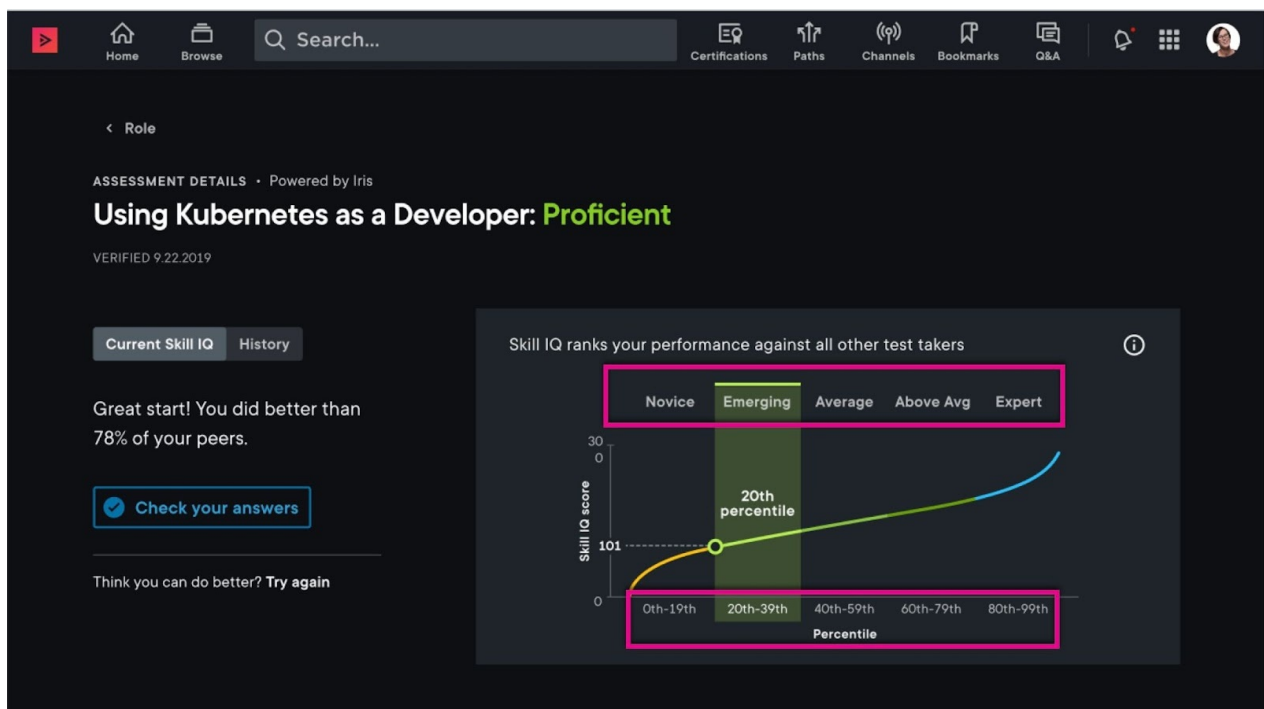

## Skill IQ

Now your Skill IQ score and percentile are mapped to one of five levels:

- Novice (0th-19th percentiles)
- Emerging (20th-39th percentiles)
- Average (40th-59th percentiles)
- Above Average (60th-79th percentiles)
- Expert (80th-99th percentiles)

This places visual emphasis on the percentile instead of the score.

The graph is also now responsive on smaller screens.

## Leader releases

### Advanced skills inventory analytics

Team managers and admins on plans with advanced analytics now have a new tool in advanced skills inventory analytics. The **proficiency trend over time** visualization shows the progress of learners who have reassessed (taken the same assessment more than once) on any assessments that are part of the selected subject.

Read about how this new analytics experience can help your team in [Skills inventory analytics: advanced](#).

### 55 reassessed users trend over time
