

## Flow release: June 17, 2022

---

Tags: [Flow](#)

### Features and major changes

- Now you have access to the [Team health insights](#) report. Use this report to view information related to your teams' coding processes and code collaboration. This information helps you investigate and diagnose potential issues as well as see where your team is succeeding.
- When Flow finds new merge suggestions, an alert notification appears by the **Settings** icon in the top navigation bar. Find details about these merge suggestions on **Settings home**, under **User health**. Once merge suggestions are viewed or merged, the alert disappears. Learn more about [merging users](#).

### Resolved issues

- Unable to view participants in PR resolution
- Misaligned charts in PR resolution
