

Watching courses on the mobile app

Tags: **ACC**

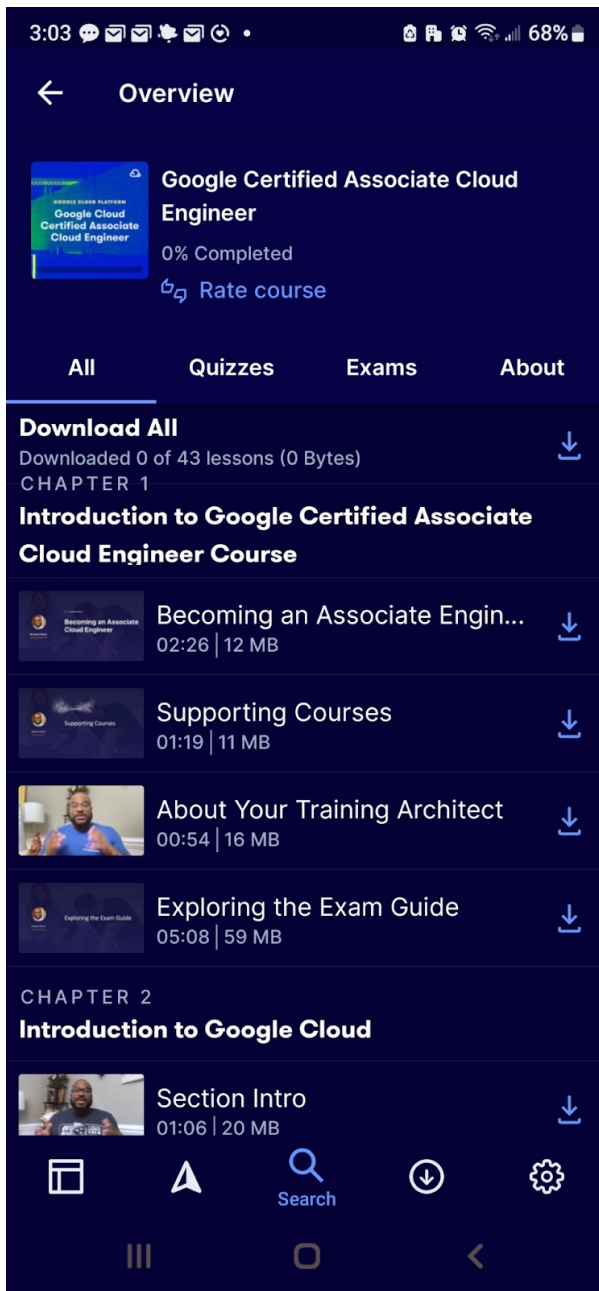

We want our mobile app to be seamless and simple—so we've tried to make it easy for you to learn on the go.

Start learning on the go

1. Go to the **Search** tab and find the course you want to start studying.
2. If you haven't watched the course before, you'll see a **Start the Course** button at the top. Tap the button when ready.

3. You can then tap on any videos within the course to start studying online or [download courses to study offline](#).

If you need help, please contact [Pluralsight Support](#).
