Finding new course content

Our team works hard to bring exciting new courses and content to our platform. You can find these updates in our monthly **ACG Insider** emails that go out monthly.

You can also find new courses in the app.

To find courses:

1. Log into your ACG account.
2. Click the **Browse** icon on the top navigation bar.
3. Find the “Recently added” section.
4. Click **See all [#] courses**.

You can also [browse all courses](#), then filter by “newest”.

Suggesting course content

We're always open to feedback. If you've got any suggestions for new content -- small or large -- let us know. You can send feedback from within any lessons by clicking the thumbs up/ thumbs down icons. You can also use our

contact form.

To leave feedback:

1. Navigate to our [contact form](#).
2. In the “Where should this ticket go?” field, select **A Cloud Guru content feedback** from the dropdown list.
3. Complete the other required fields including a description of your course suggestion(s). You'll also have the option to attach any related resources, screenshots etc..
4. Click **Submit** once finished.

Resources for subject matter experts

If you're a subject matter expert and want to teach a course or topic of interest, we'd love to hear from you as well! We're always looking for new instructors both full time and freelance. Check out our [careers page \(opens in new tab\)](#) for more info.

If you need help, please contact [Pluralsight Support](#).
