

SSO integration with OneLogin

Tags: **ACG**

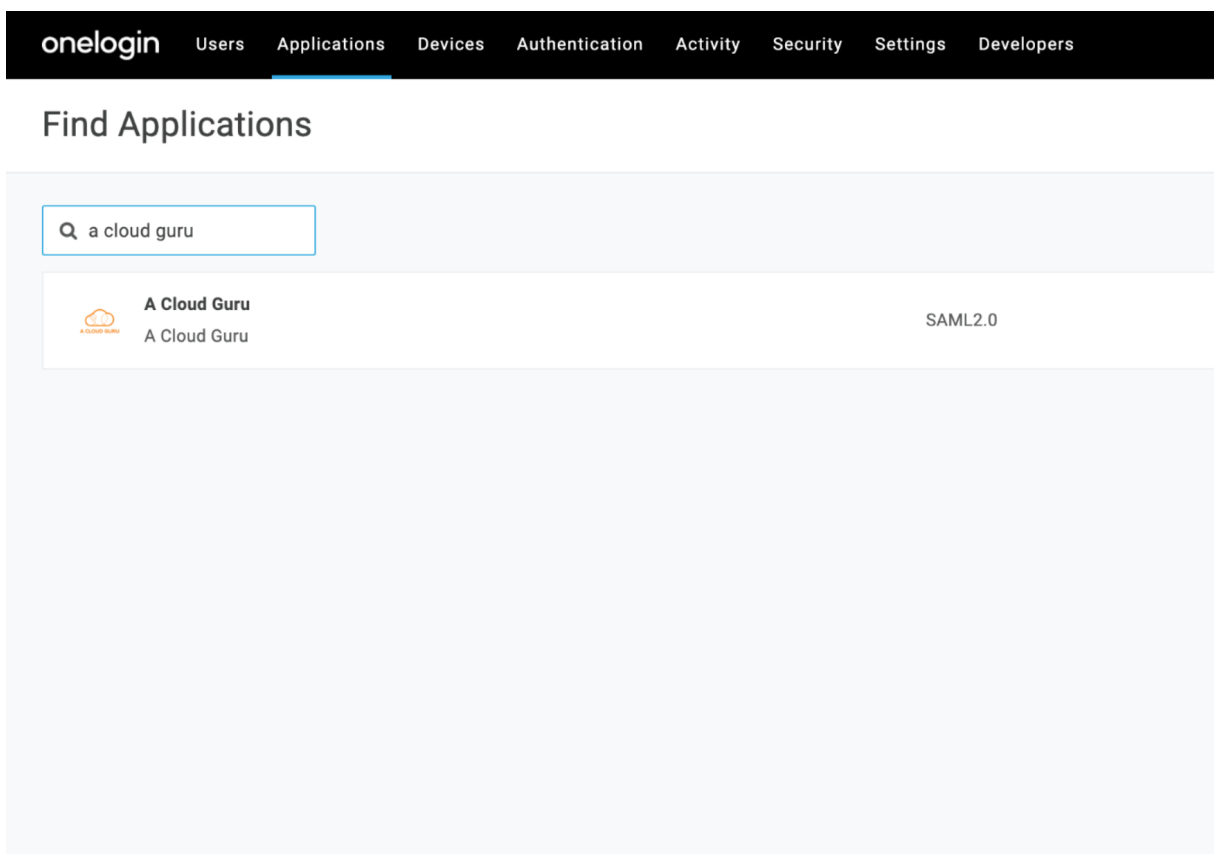

Single Sign-on ensures your team can easily access their A Cloud Guru training dashboard directly through your Identity Provider (IdP) application or from the ACG log in page.

We have included OneLogin SSO connection details specific to your ACG Business Plus account. Please follow the steps below to ensure your A Cloud Guru OneLogin application is created with the appropriate settings and attributes.

Create a SAML 2.0 Okta application:

To get started, sign into OneLogin Admin > Click Applications > Click Add App.

1. Next search for **A Cloud Guru** and click the ACG app.

2. A Cloud Guru app page will load, click **Save** button.

Configuration

Portal

Display Name
A Cloud Guru

Visible in portal

Rectangular Icon

Upload an icon with an aspect-ratio of 2.64:1 as either a transparent .PNG or .SVG

Square Icon

Upload a square icon at least 512x512px as either a transparent .PNG or .SVG

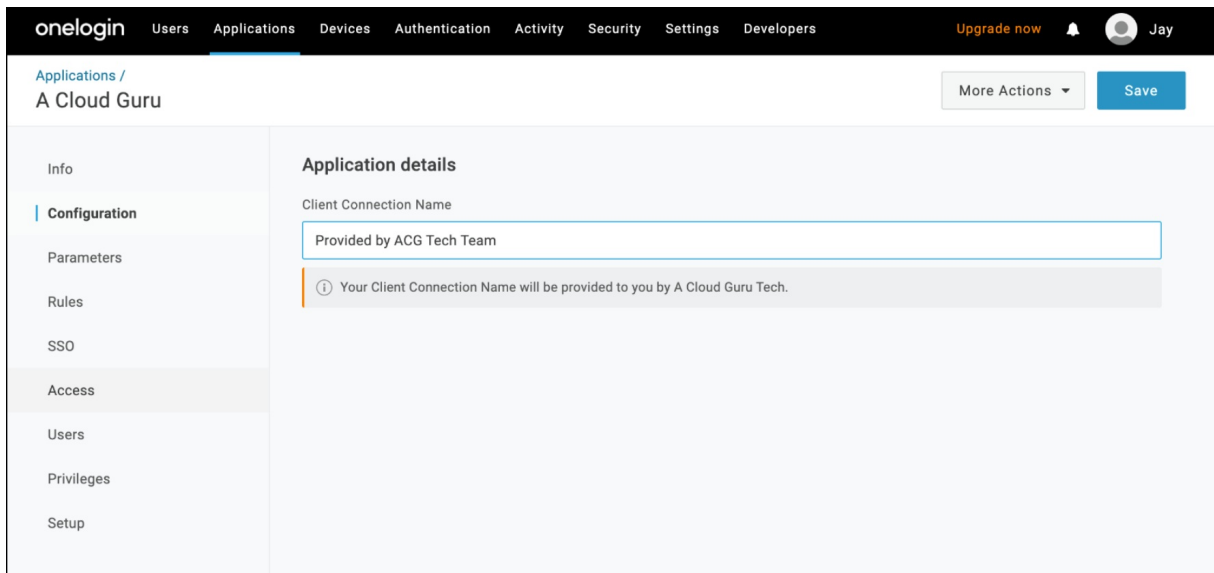

Description

200 characters

Personal or Organization App

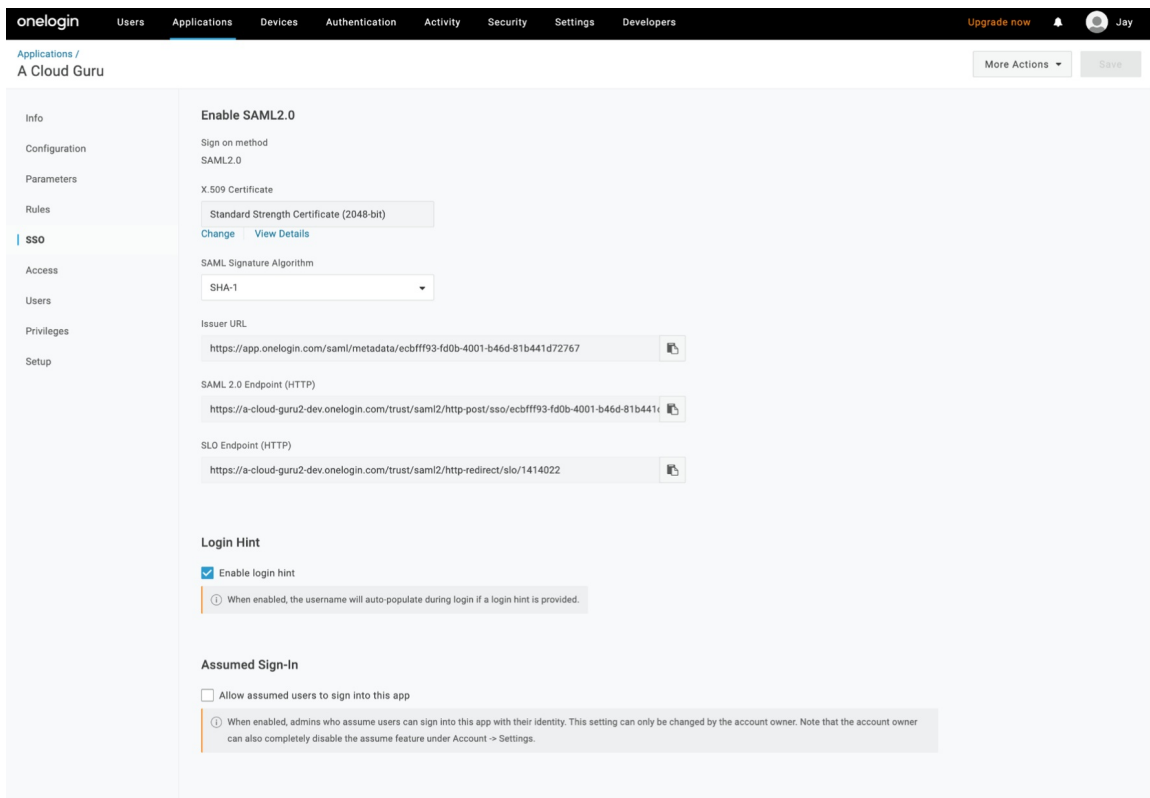

Organization (A Cloud Guru)

3. Click Configuration, and then Add in Client Connection Name **provided by ACG** and click **Save**.

4. After the A Cloud Guru OneLogin application has been created, please download and forward the following information through email. This can be found through the **SSO** link.

- o SAML endpoint
- o X.509 Certificate (.pem or .cet)
- o

The Integrations Consultant will reach back out with steps to move forward with information regarding testing (roughly 3 -5 business days on average) of your new connection.
