

Final practice exam includes topics not mentioned in the course

Vendor exams are constantly changing, and our observations are that the question pool often include fringe topics that while not included in every exam may show up on some exams.

Like the vendor final exam, we include some of the fringe topics in the question pool for the practice exams, along with notes as study aids. We found that when we added this content to the practice exams the pass rates and pass scores increased. You are free to explore these topics further with the possibility that the further reading may get you a few extra points in the exam, or decide to skip these topic and focus exclusively on the core lesson topics.
