

How do I update the name or address on my receipts?

Tags: **ACG**

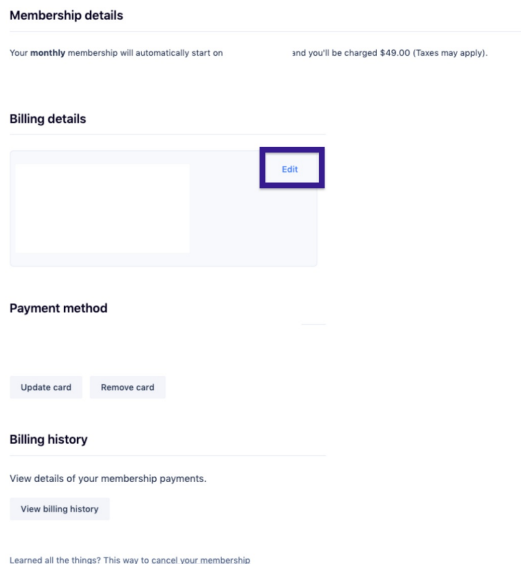

Whether you're moving or just didn't have enough coffee before inputting your details, we have a simple way to update your billing information.

1. Go to your [membership page \(opens in new tab\)](#) in your account settings

2. Click **Edit** in the Billing Details Section

Membership Settings

3. Enter your updated billing information
4. Save billing details

Your billing details are now saved for future invoices.

Important: You will not be able to change between currencies without creating a new account. For example, if you move from Ukraine to the US, you will not be able to update to USD on the same account. You will need to create a new account to change currencies.

If you need an updated invoice from prior to April 2020 you will likely need to [contact our Support team](#) to update your receipts with the following details:

- Name
- Email
- Company name - if applicable
- Address
- Payment information

If you're wanting to change your billing method moving forward—which will also change your name and address—please see [How can I update my payment details?](#).

If you need help, please email [Pluralsight Support \(opens email form\)](#) for 24/7 assistance.
