

Playground sandboxes: getting started

Tags: **ACG**

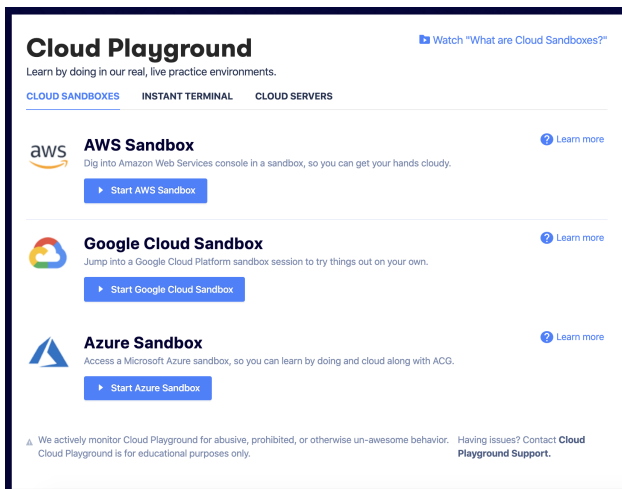

You can now play in the Cloud playground to your heart's desire. The best part? It's included in your Personal Plus or ACG for Business membership.

Accessing the playground

1. Click **Cloud playground** from the top of your dashboard.

Three options are available and work together within the playground: cloud sandboxes, instant terminal, and cloud servers.

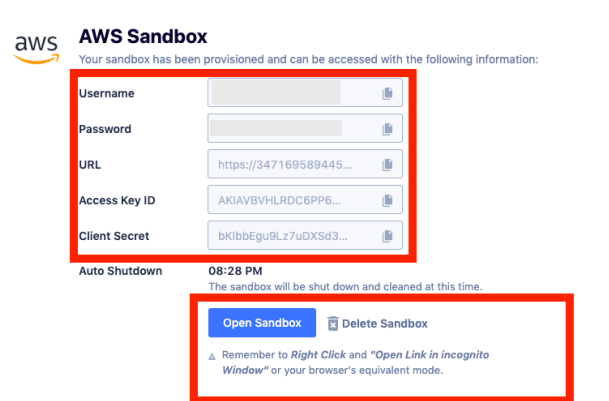

2. Click **Start (cloud platform)** beneath your preferred sandbox to present your login information. You'll need to copy and paste this login information into the Cloud provider login after opening the Sandbox in the next step.

Cloud Playground

Learn by doing in our real, live practice environments.

[CLOUD SANDBOXES](#) [INSTANT TERMINAL](#) [CLOUD SERVERS](#)

aws **AWS Sandbox**
Your sandbox has been provisioned and can be accessed with the following information:

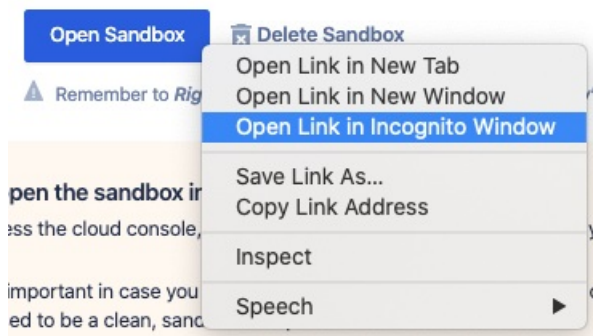

Username	<input type="text"/>	Copy
Password	<input type="password"/>	Copy
URL	https://347169589445...	Copy
Access Key ID	AKIAVBVHLRDC6PP6...	Copy
Client Secret	bKlbbEgu9Lz7uDXsd3...	Copy

Auto Shutdown: **08:28 PM**
The sandbox will be shut down and cleaned at this time.

[Open Sandbox](#) [Delete Sandbox](#)

⚠ Remember to *Right Click* and "*Open Link in incognito Window*" or your browser's equivalent mode.

3. Right-click **Open cloud sandbox** and choose **Open link in incognito window/open link in new private window** to start your Cloud journey. Opening in incognito ensures that any cookies or 3rd party extensions do not interfere with your Cloud sandbox. We do not recommend using Internet Explorer or Microsoft Edge.

Now that you have your preferred platform environment created, you can start practicing the skills you're learning. Continue working through other articles on the playground components or feel free to just play around for a little while.

If you need help, please email [Pluralsight Support \(opens email form\)](#) for 24/7 assistance.
