

Troubleshooting audio problems

Tags: **ACC**

If you can view the course video, but have no audio, try these troubleshooting tips:

- Check if other videos are having playback issues on sites like YouTube or Vimeo
- Adjust your computer's volume or verify that the speakers are plugged in
- Reboot your device

If you continue experiencing issues after trying the above recommendations, please [contact our Support team](#).

If you need help, please email [Pluralsight Support \(opens email form\)](#) for 24/7 assistance.
