### Microsoft Azure Infrastructure and Deployment

#### Exam AZ-100

This exam is for the **Azure Administrator** role and the [Microsoft Certified: Azure Administrator Associate](#) certification. Candidates for this exam are Azure Administrators who manage cloud services that span storage, security, networking, and compute cloud capabilities. Candidates have a deep understanding of each service across the full IT lifecycle, and take requests for infrastructure services, applications, and environments. They make recommendations on services to use for optimal performance and scale, as well as provision, size, monitor, and adjust resources as appropriate. Candidates for this exam should have proficiency in using PowerShell and the Command Line Interface. Candidates should have a basic familiarity or knowledge of Azure Portal, ARM templates, operating systems, virtualization, cloud infrastructure, storage structures, and networking. Exam AZ-100 includes such topics as: Manage Azure subscriptions and resources; implement and manage storage; deploy and manage virtual machines; configure and manage virtual networks; and manage identities.
