

Connecting your team's data to your business intelligence tool

Tags: **ACG**

Administrators can connect your business intelligence tools to your ACG team data with API keys. These keys help you harness the power of your data.

See [A Cloud Guru API \(opens a new tab\)](#) for detailed technical information about APIs in ACG.

[Creating an API key](#)

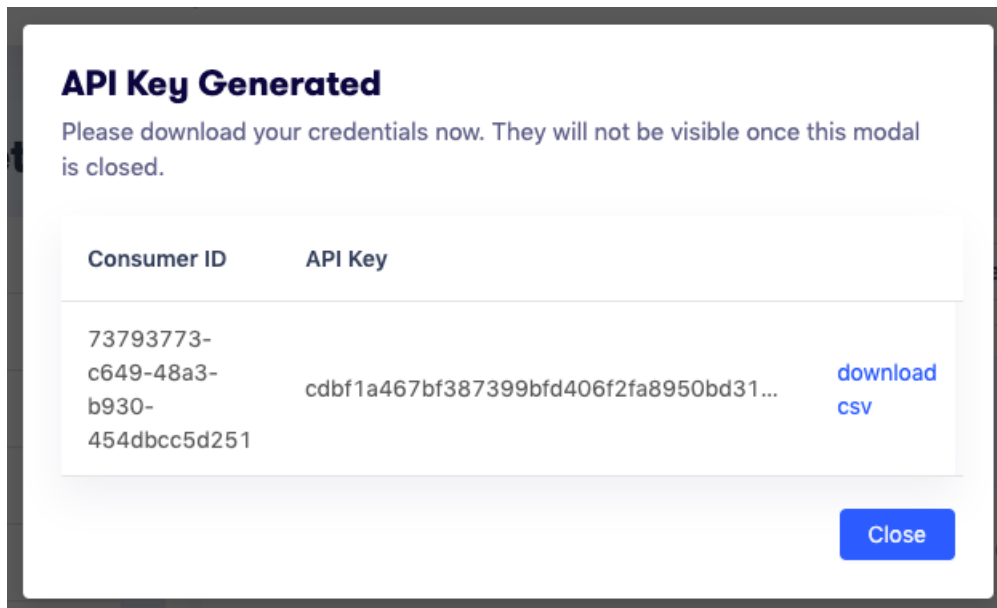

[Deleting API keys](#)

Creating an API key

1. Click your profile image and click **Account settings**.
2. Click **Reporting API Access** under **Organization Settings**.
3. Click **+ Create API Key**.

4. Name the API and click **Create**. This will generate your API key and your Consumer ID.

5. Click the **download csv** link.

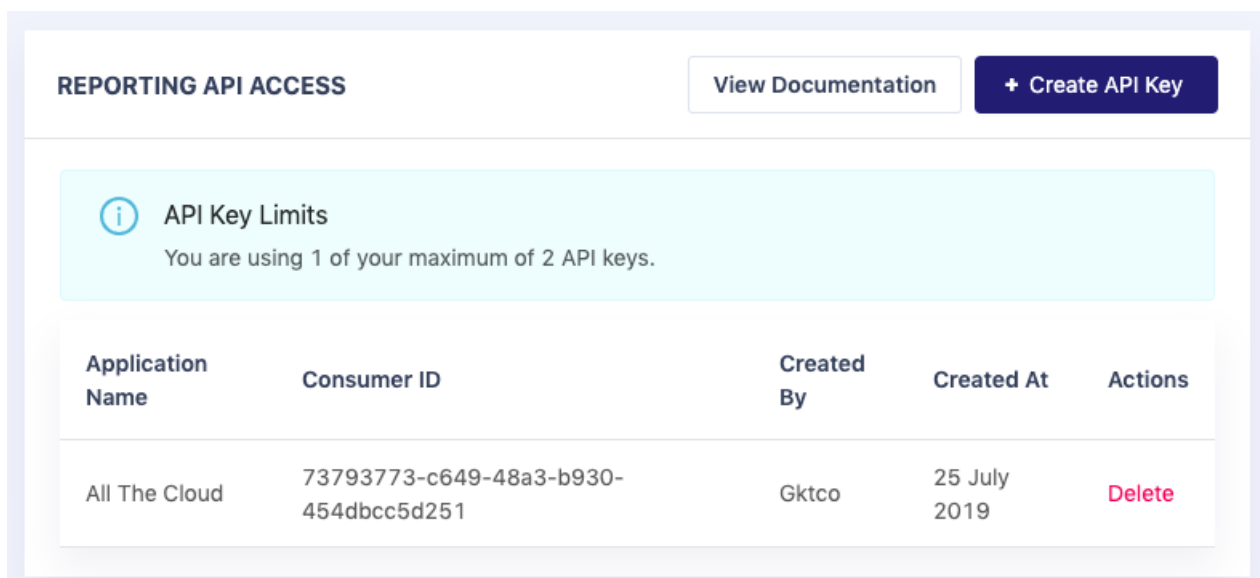

Warning: The CSV download is not available once this screen is closed.

Give the CSV download to the person at your organization who manages your business intelligence tool to link your data.

Deleting API keys

Your organization is limited to a specific number of API keys. This limit is displayed at the top of the Reporting API Access page. If you've reached your limit and need to create a new API key, you'll need to decide which API key to delete before creating a new one.

To delete an API key:

1. Click your profile image and click **Account settings**.
2. Click **Reporting API Access** under **Organization Settings**.
3. Click Delete next to the API you want to delete.

Warning: This action cannot be undone.
