## Help Center

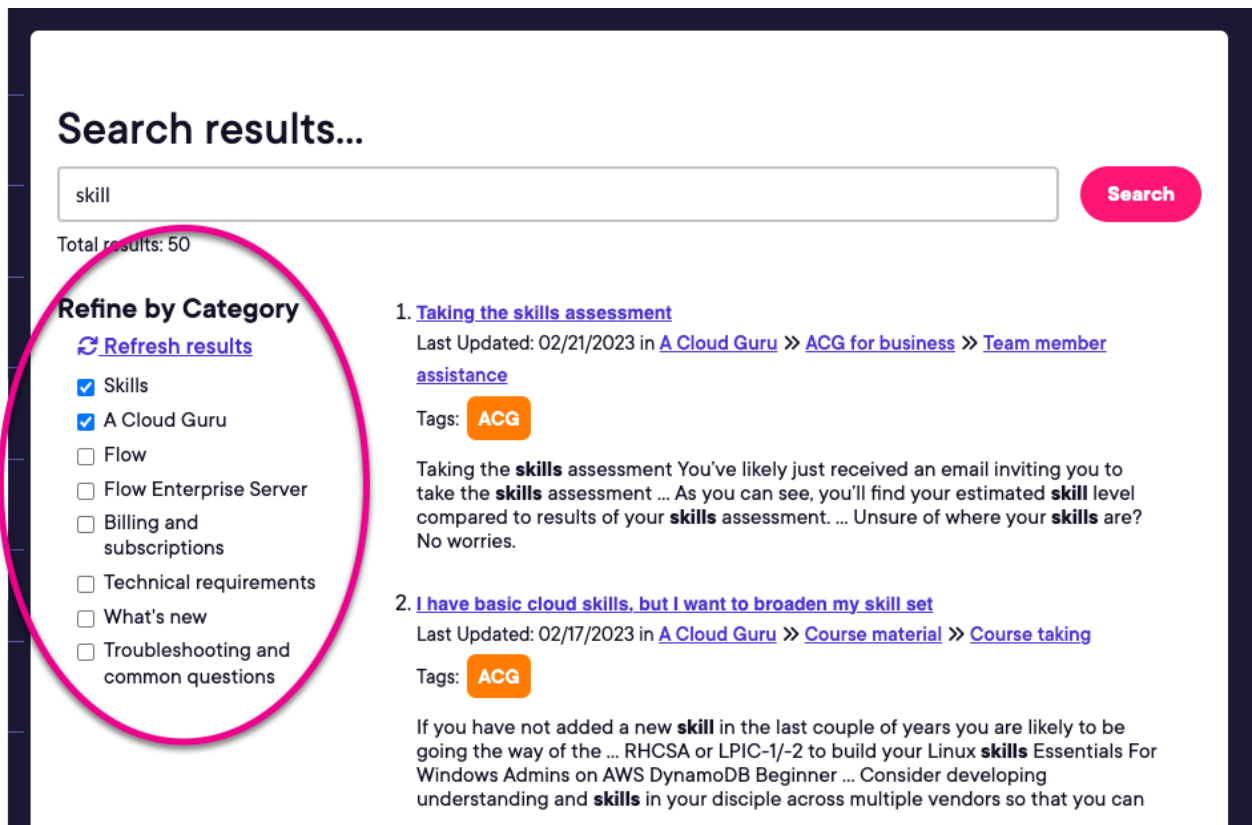

### The Help Center welcomes A Cloud Guru

The [Pluralsight Help Center](#) is proud to welcome A Cloud Guru (ACG) to our lineup. Now you can find articles for Skills, ACG, and Flow—all under one roof.

## Search results filtering

Now you can filter your Help Center [search results](#) by top-level category. This makes it easier to find what you need when your search term appears in multiple categories.

## Learner releases

### Tech Foundations post-assessment redesign

The post-assessment page for [Tech Foundations \(opens in new tab\)](#) has been redesigned to better meet the needs of learners. This redesign organizes missed questions by video clip instead of topic and displays a link to the specific clip of the topic video that the learner should rewatch. The summary doesn't give the specific answer, but it allows the learner to better understand where they need to improve.

## Leader releases

### Advanced Skills Inventory analytics

#### Custom skill groups

Now you can use [custom skill groups](#) to create a customized Inventory report made up of specific skills to match your organization's unique learning goals and objectives.

#### User skill progression

Now you can view individual skill progression in the Skills Inventory report (subject detail view). The report has been redesigned to surface the tools you've been asking for:

- The **Reassessed users trend over time** and **Skill level breakdown visualizations** help you see where your team lies as a whole for a particular subject and skill set.
- The **Skills assessments** tab now allows you to invite engaged, unassessed learners to [take an assessment](#) right from the report.
- The new **User skill progression** tab shows you the [initial and current skill level](#) for each assessment a learner has taken, showing you the results of their time spent in the Skills platform.
- The **User engagement** tab shows [assessment activity](#) by individual users and allows you to see the content and assessment interactions that have contributed to their current skill level.

## Apps and offline viewing

### Tech Foundations for mobile

Learners with access to [Tech Foundations](#) can now watch Tech Foundations courses on our mobile apps. Download the app from our [downloads page \(opens in new tab\)](#) to start learning on the go.

If you need help, please email [Pluralsight Support \(opens email form\)](#) for 24/7 assistance.
