

Flow release: April 14, 2023

Tags: [Flow](#)

Features and major changes

- Now you can set targets for [Reaction time](#) and [Responsiveness](#). Learn more about [setting targets](#).
- Now you can set date ranges in the [Check-in report](#) up to a full trailing year when using the preset date ranges.
- The Spot check report has been sunset. Now, use reports like [Work log](#), [Project timeline](#), and [Team health insights](#) to see patterns in your teams' commit-based metrics.

Miscellaneous updates and fixes

- Now when you click on a link to [Ticket log](#) from [Investment profile](#), canceled tickets are automatically filtered out.

Resolved issues

- Unable to update OAuth connection to GitHub
- Unable to see certain sprints in ticket reports
- Unable to remove or edit columns in ticket project configurations
- Unreviewed PRs percentage displaying as N/A in Review collaboration
- Setting custom date ranges in Retrospective incorrectly setting end date
- Removed configurations for deprecated reports

If you need help, please contact [Pluralsight Support](#).
