

## Improved ACG dashboard recommendations

Tags: ACC

Your A Cloud Guru dashboard recommendation widget is leveling up to provide you with a completely personalized experience.

Unlike the former static widget, the upgraded 'Recommended for you' widget uses Skills machine learning to study your interests and content engagement. This new feature leverages that data to optimize your learning experience —tailoring content recommendations to your specific cloud journey.

Housing this widget on your dashboard means you'll have relevant and personalized content conveniently at your fingertips. [Head to your dashboard](#) (opens in new tab) and check it out for yourself.

If you need help, please contact [Pluralsight Support](#).
