

## Flow release: June 2, 2023

---

Tags: [Flow](#)

### Features and major changes

- Now you can access the DORA (DevOps Research and Assessment) metrics in Flow. By utilizing these metrics, your team can identify areas for improvement in throughput and stability, leading to better business outcomes. The four metrics are:
  - [Change failure rate](#)
  - [Time to restore service](#)
  - [Deployment frequency](#)
  - [Lead time for changes](#)

View these metrics from the [Team Health Insights](#) report, [Retrospective](#) report, and [Reports home](#).

Learn more about [Flow's DORA metrics](#).

### Resolved issues

- Some PRs showing as Open in Flow, even when they've been merged.
