Leader releases

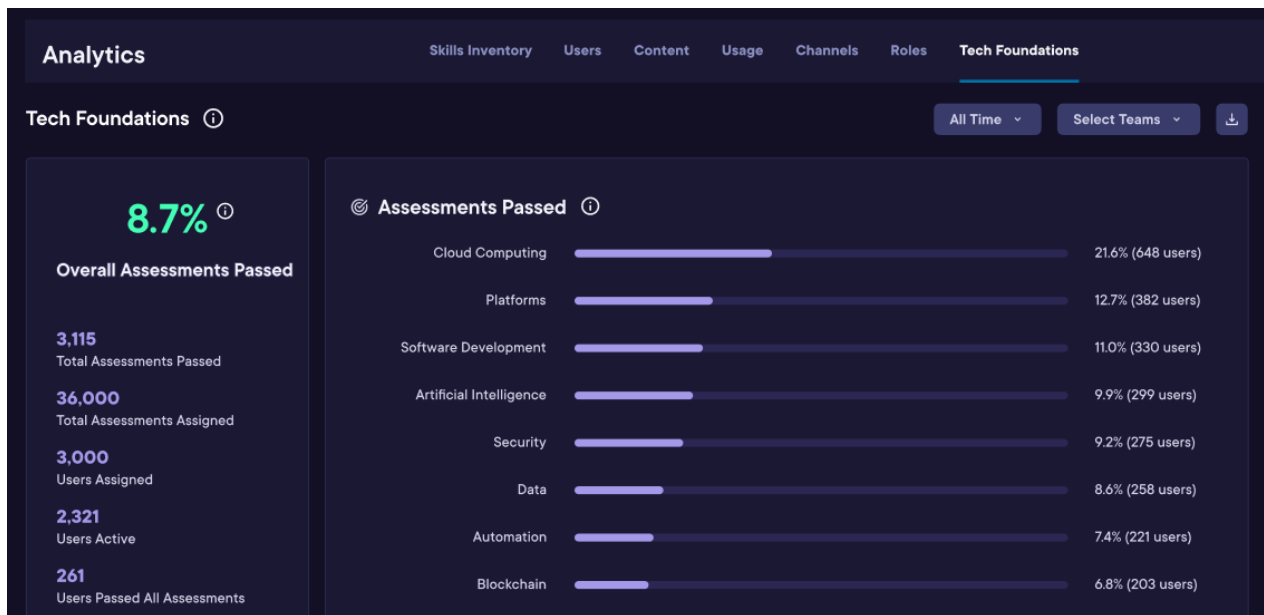

Analytics

Tech Foundations

Plans with **Tech Foundations** now have a new [Tech Foundations analytics](#) page. The insights found there show you:

- Overall assessments assigned and passed
- Users assigned and active

- Topic completion
- Assessment pass rates by topic
- And more

Skills inventory

Skills inventory analytics has an updated [Detail CSV](#), making it easier to find the data you need. Here are the highlights:

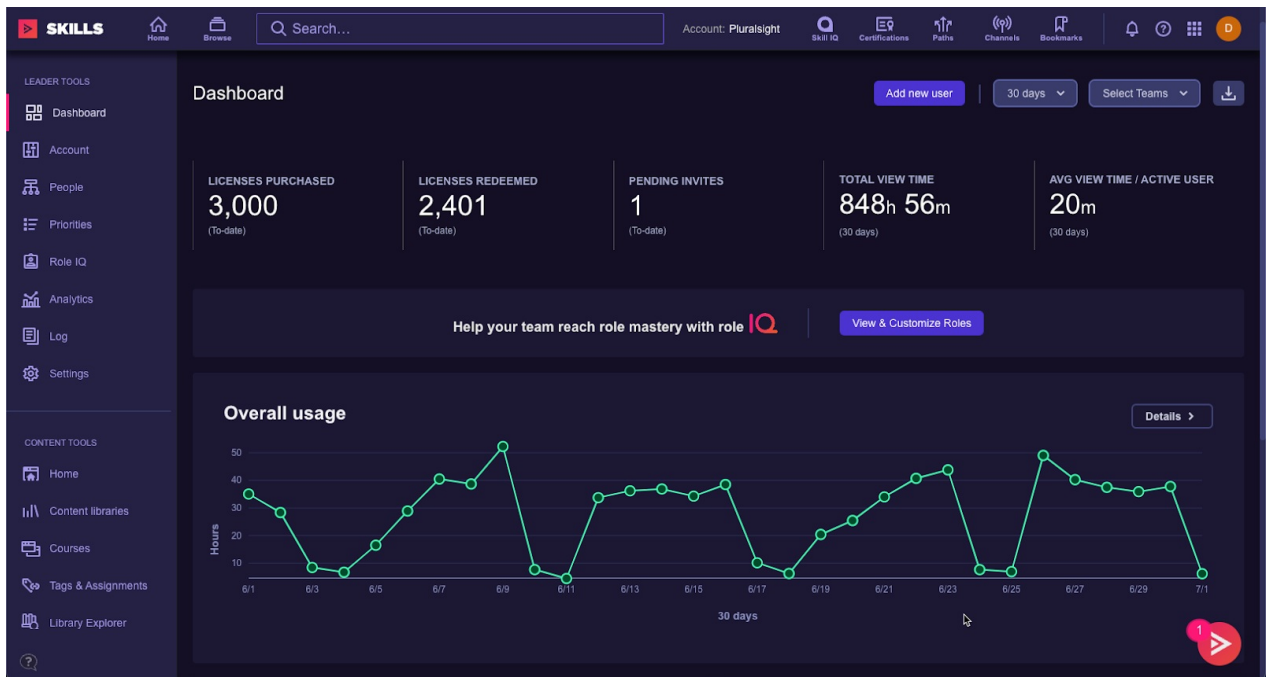

- Any skill assessment that has multiple subjects will now only have one line item per user in the download.
- The **Quintile** column has been renamed **Current skill level**.
- A new **Initial skill level** column has been added. This will contain a null value (empty) if only taken once.

Subjects

Subjects analytics will be deprecated July 13, 2023 to help reduce redundancy and streamline reporting needs. You can still find all the information you need through either [Skills inventory](#) analytics or [Content](#) analytics.

Dashboard

An updated **Leader dashboard** now better surfaces information dynamically tailored to your plan. Quick links take you directly to some of the most valuable features on the Skills platform, including Role IQ and relevant analytics reports.

People and plan management

The **Teams** tab now provides a streamlined experience for numerous team-related actions formerly only available from other tabs. Available actions from the **Teams** tab now include:

- Edit team name
- Add or remove team manager
- Revoke team member invite
- Re-invite team member
- Remove member from team
- Add new or existing user to team
- Edit email and notes
